P089 - Translational Research (Clinical and Basic)

- Title: The effect and immune cell analysis of Ganoderma lucidum in the treatment of colorectal cancer
- Authors: Xiaojing Zhao, JINGYI CHEN
- Affiliation: Department of Medical Imaging, National Taiwan University

P069 - Basic Research

- Title: NEDD8 activating enzyme inhibitor MLN4924 aggravates intestinal inflammation
- Authors: Nurulamin Noor, Digital Spatial Profiling Reveals Functional Shift of Enterochromaffin Cell in Intestinal Inflammation
- Affiliation: Affiliated Hospital of Hebei University

P099 - Basic Research

- Title: DCAF2 alleviates intestinal inflammation by regulating the proliferation and apoptosis of intestinal epithelial cells
- Authors: Li Huihui, Yan Chen
- Affiliation: Amsterdam UMC location AMC

P108 - Translational Research (Clinical and Basic)

- Title: MCPIP-1-mediated immunosuppression of neutrophils exacerbates acute intestinal inflammation
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P079 - Clinical Research

- Title: The Role of Perioperative Blood Glucose Level in Predicting Postoperative Nutrition in Patients with Crohn's Disease
- Authors: Jian Lin, The First Affiliated Hospital of Sun Yat-sen University

P109 - Translational Research (Clinical and Basic)

- Title: The efficacy and cost-effectiveness analysis of anti-TNFα agents in the treatment of Crohn's disease
- Authors: Xiangya Hospital of Central South University

P100 - Translational Research (Clinical and Basic)

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Yarong Wei, Union Hospital, Tongji Medical College, Huazhong University of Science & Technology

P101 - Translational Research (Clinical and Basic)

- Title: The impact of systemic inflammation on the long-term outcomes of patients with Crohn's disease
- Authors: Hailan Zhao, The First Affiliated Hospital of Sun Yat-sen University

P102 - Clinical Research

- Title: Intestinal Inflammation and Its Antibodies in the Prediction of Crohn's Disease
- Authors: Xiaqiong Mao, The First Affiliated Hospital of Sun Yat-sen University

P103 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P088 - Clinical Research

- Title: Serum interleukin-6 level in the early detection of Crohn's disease with Epstein-Barr virus infection
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P104 - Clinical Research

- Title: MCPIP-1-mediated immunosuppression of neutrophils exacerbates acute intestinal inflammation
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P087 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jian Lin, The First Affiliated Hospital of Sun Yat-sen University

P105 - Translational Research (Clinical and Basic)

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P106 - Clinical Research

- Title: Intestinal Inflammation and Its Antibodies in the Prediction of Crohn's Disease
- Authors: Xiaqiong Mao, The First Affiliated Hospital of Sun Yat-sen University

P107 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P108 - Translational Research (Clinical and Basic)

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P109 - Translational Research (Clinical and Basic)

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P110 - Translational Research (Clinical and Basic)

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P111 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P112 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P113 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P114 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P115 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P116 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University

P117 - Clinical Research

- Title: The role of postoperative ileus in the etiology of postoperative ileus
- Authors: Jing Xu, Junrong Li
- Affiliation: The First Affiliated Hospital of Sun Yat-sen University
P1418 4-Clinical Research A new pathway ameliorating post-traumatic stress disorder: focus on resveratrol and its metabolites and the "good" 5-HT 2A receptor.
Yanghuai Department of Gastroenterology and Hepatology, PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1419 4-Clinical Research Role of circulating progenitor cells in wound healing and response prediction in refractory Crohn's disease patients: an observational study.
Xin Fan Department of Gastroenterology, PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1420 4-Clinical Research Association between early endoscopic submucosal dissection (ESD) and histological recurrence in patients with Crohn's disease.
Xu Xian Department of Gastroenterology, PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1421 4-Clinical Research Application of a clinical decision support tool for predicting biochemical remission with endoscopic therapy in patients with ulcerative colitis.
Shuang Gu Department of Gastroenterology, PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1422 4-Clinical Research Multimodal improvement in health-related quality of life in patients with moderate-to-severe Crohn's disease across Week-56 of the SUPPORT trial.
Xiaohua Zhou Beijing Hospital of Peking Union Medical College 4-Presenter

P1423 4-Clinical Research The impact of exclusive enteral nutrition on the gut microbiome in adults with inflammatory bowel disease.
Lei Han Department of Gastroenterology, Tongji Hospital, Tongji University, Shanghai, China 4-Presenter

P1424 4-Clinical Research Improvement of clinical meaningful improvement in health-related quality of life in patients with ulcerative colitis: a randomized, controlled, parallel-group study (R-M ELSA).
William J. Sandborn University of California San Diego, La Jolla, CA, USA 4-Presenter

P1425 4-Clinical Research RNC-Based Inflammatory Response and Associated MMPs Inflammation in DIO-induced colitis.
Hong Wang Fudan University Hospital, Tongji Medical College, Huazhong University of Science and Technology 4-Presenter

P1426 4-Clinical Research Interference of centrifugal blood flow in Crohn's disease and Helicobacter pylori co-infection: Preliminary mapping of angiotensinogen receptors on human colonic cells.
Fengyun Qian General Hospital of Northwestern Theater Command 4-Presenter

P1427 4-Clinical Research Long-term outcomes of Crohn's disease patients with treated immunological lesions: Damage Index from a single-center study.
Shuang Gu General Hospital of Northwestern Theater Command 4-Presenter

P1428 4-Basic Research Novel metallic nanoparticles (Differentially Regulated Th1 and Th17 Cell Inflammation and Function) for the treatment of Crohn's disease.
Jing Chen Department of Gastroenterology, The Ninth People's Hospital, Tongji University, Shanghai, China 4-Presenter

P1429 4-Basic Research Analysis of clinical and endoscopic features of patients with ulcerative colitis: the role of endoscopic submucosal dissection.
Wenping Yang Peking University Health Science Center, Beijing, China 4-Presenter

P1430 4-Clinical Research Differences in the anxiety and depression levels in patients older than or younger than 60 years with ulcerative colitis.
Feng Yang The Catholic University of Korea Seoul St. Mary 4-Presenter

P1431 4-Clinical Research Adherence to scheduled clinical care in inflammatory bowel disease patients with chronic, severe, uncontrolled disease:
Yanan Wang Yale School of Medicine, New Haven, USA 4-Presenter

P1432 4-Clinical Research Analysis of clinical and endoscopic features of patients with ulcerative colitis: the role of endoscopic submucosal dissection.
Wenping Yang Peking University Health Science Center, Beijing, China 4-Presenter

P1433 4-Clinical Research The role of endoscopic submucosal dissection in the treatment of inflammatory bowel disease.
Jia Li Fudan University Hospital, Tongji Medical College, Huazhong University of Science and Technology 4-Presenter

P1434 4-Clinical Research Identification of microRNA-16-5p and microRNA-21-5p in feces as potential biomarkers for detecting cancerous vs. non-cancerous colon tissue.
Guanlin Lu University of California, San Diego, CA, USA 4-Presenter

P1435 4-Clinical Research Clinical characteristics and outcomes in ustekinumab-treated adults in the UNITI studies by age at Crohn's disease onset.
Miao Sun New York University School of Medicine, New York, USA 4-Presenter

P1436 4-Clinical Research Monitoring the postoperative inflammatory response and ileus after surgery for inflammatory bowel disease.
Xiaoshan Shen Shanghai Hospital of Tumor Medical College, Shanghai University of Science and Technology 4-Presenter

P1437 4-Clinical Research Identification of microRNA-16-5p and microRNA-21-5p in feces as potential biomarkers for detecting cancerous vs. non-cancerous colon tissue.
Guanlin Lu University of California, San Diego, CA, USA 4-Presenter

P1438 4-Clinical Research Oral beclomethasone dipropionate as an add-on therapy and response prediction in clinical practice.
Shuang Gu Department of Gastroenterology, PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1439 4-Clinical Research Clinical Study on the Relationship Between Serum Homocysteine and Ulcerative Colitis.
Yao Liu Wuhan University, Wuhan, China 4-Presenter

P1440 4-Clinical Research Association between early vedolizumab trough levels and biochemical remission in patients with ulcerative colitis.
Jianbo Peng Shanghai Jiao Tong University 4-Presenter

P1441 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Xixian Zhao Department of Gastroenterology, The Second Affiliated Hospital of Zhejiang University 4-Presenter

P1442 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1443 4-Clinical Research Clinical efficacy of fecal microbiota transplantation for patients with small bowel Crohn's disease.
Guanghui Ren PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1444 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1445 4-Clinical Research Association between early vedolizumab trough levels and biochemical remission in patients with ulcerative colitis.
Jianbo Peng Shanghai Jiao Tong University 4-Presenter

P1446 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1447 4-Clinical Research Clinical efficacy of fecal microbiota transplantation for patients with small bowel Crohn's disease.
Guanghui Ren PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1448 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1449 4-Clinical Research Association between early vedolizumab trough levels and biochemical remission in patients with ulcerative colitis.
Jianbo Peng Shanghai Jiao Tong University 4-Presenter

P1450 4-Clinical Research Association between early vedolizumab trough levels and biochemical remission in patients with ulcerative colitis.
Jianbo Peng Shanghai Jiao Tong University 4-Presenter

P1451 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1452 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1453 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1454 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1455 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1456 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1457 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1458 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1459 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1460 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter

P1461 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Shouquan Dong Department of Gastroenterology, The Second Affiliated Hospital of Dalian Medical University 4-Presenter

P1462 4-Clinical Research Inflammatory Bowel Disease Intelligent Identification Based on Deep Learning.
Wenwei Qian PLA General Hospital of Xi'an Jiaotong University 4-Presenter
The research presented in this document includes clinical and basic studies. Some of the key studies highlighted are:

1. Clinical Research
   - "Clinical Research" by Xiaoping Lv and Deng Beiying focuses on aspects of clinical research.
   - "Clinical Research" by Zhang Bei and Liping Chen discusses clinical research.
   - "Clinical Research" by Yunling Wen explores clinical research.

2. Basic Research
   - "Basic Research" by Meng Chen and Ying Chen delves into basic research.
   - "Basic Research" by Chenjing Xu examines basic research.

3. Translational Research (Clinical and Basic)
   - "Translational Research (Clinical and Basic)" by Ying Chen and Meng Chen investigates translational research.
   - "Translational Research (Clinical and Basic)" by Ruoyi Zhang explores translational research.

4. Case
   - "Case" by Shuchun Wei discusses a specific case.

5. Translational Research (Clinical and Basic)
   - "Translational Research (Clinical and Basic)" by Jinshen He examines translational research.

6. Case
   - "Case" by Sir Run Run Shaw Hospital, School of Medicine, Zhejiang University and Keio University Hospital discusses a specific case.

7. Translational Research (Clinical and Basic)
   - "Translational Research (Clinical and Basic)" by Jinshen He explores translational research.

8. Basic Research
   - "Basic Research" by Jinshen He examines basic research.

9. Clinical Research
   - "Clinical Research" by Jinshen He discusses clinical research.

10. Basic Research
    - "Basic Research" by Jinshen He explores basic research.

11. Clinical Research
    - "Clinical Research" by Jinshen He discusses clinical research.

12. Basic Research
    - "Basic Research" by Jinshen He examines basic research.
1-Clinical Research

Bioelectrical impedance phase angle: a non-invasive index to monitor the disease
Zixiao Zhao
Peking Union Medical College Hospital

Clinical study on the expression of FUT2 and FUT3 in the intestinal mucosa of
Qijin Hong
Small Intestinal Bacterial Overgrowth, A Predictor of Clinical Relapse in Patients
Wuhan University

Relationship between endoscopic scores and histological scores in ulcerative
Seulji Kim
Mingyue Guo
2-Basic Research

A Low FODMAP Diet can reduce gastrointestinal symptoms in patients with
Xiaochen Zhang
Dandan Wang
2-Basic Research

Activation of platelet NLRP3 inflammasomes in Crohn's disease
Xuyang Dong
Sir Run Run Shaw Hospital, College of Medicine Zhejiang Fudan University

Dose the GLIM criteria represent more appropriate for nutritional assessment in
Xin Chen
Qilu hospital of Shandong university

The efficacy and safety of cyclophosphamide for intestinal Behcet's disease
Ziheng Peng

Prevalence and Predictors of Non-alcoholic Liver Disease on MRI among Patients
Lingya Yao
Runing Zhou
2-Basic Research

All India institute of medical sciences

Hypermethylation of miR-145 promoter-mediated SOX9-CLDN8 pathway affects
Jing Sun

The Impact of Co-existing Depression and Anxiety on Outcomes in Inflammatory
Xuanfu Chen
Wuhan University

Establishment of a prediction model for reoperation risk of Crohn's disease and
Weidong Liu
Wuhan University

The impact of postoperative drug medications on reoperation rate
Alesia Mauna

Xuanfu Chen

2-Basic Research

1-Clinical Research

Long-term follow-up in children with Crohn's disease after exclusive enteral nutrition induction therapy
Jiajia jia
Children's hospital, school of medicine

Department of Gastroenterology, Peking Union Medical College Hospital

Clinical trial of infliximab in intractable bowel disease and its regulatory effect on
Yongping Song

Department of Gastroenterology and Hepatology, Key Laboratory of Gastroenterology, Ministry of Health, Inflammatory Bowel Disease Research Center, Renji Hospital,Shanghai医学院, Shanghai Jiaotong University, Shanghai Institute of Digestive Disease

2-Basic Research

Screening of IL-27 in inflammatory bowel disease patients with inflammatory bowel disease
Zujing Zhao

Department of Gastroenterology, Peking Union Medical College Hospital

Clinical trial for the estimation of early diagnosis of colorectal cancer: an experimental study
Zijie Wang

Department of Gastroenterology, Peking Union Medical College Hospital

2-Basic Research

Tingting Liu

Department of Gastroenterology, Peking Union Medical College Hospital, Beijing, China.

A retrospective cohort study

2-Basic Research

Xiaoyan Hu

Department of Gastroenterology, Peking Union Medical College Hospital

The rural incidence and prevalence of ulcerative colitis in China
Wuming Li

Peking Union Medical University

1-Clinical Research

Development and validation of new evidence-based disease activity indices of patients with Crohn's disease based on bowel mucosal and extramucosal features
Ziyi Liu

Department of Gastroenterology and Hepatology, Jinling Hospital of Nanjing Medical University, Affiliated to Nanjing Medical University

Stringent screening strategy leads to significant risk reduction of tuberculosis in patients with Crohn's disease
Mingjie Guo

Affiliated Hospital of Sun Yat-sen University, 58 Zhongshan II Road, 510080, Guangzhou, Guangdong Province, China.

2-Basic Research

RNA-seq analysis for immune genes expression in gut microbiota of experimental colitis mice

Abstract of a research paper on the risk factors for rebleeding following endoscopic therapy of small-bowel lesions.

**Background:** The risk of rebleeding after endoscopic therapy for small-bowel lesions is a significant concern. Understanding the factors that contribute to rebleeding can help in improving patient care and outcomes.

**Methods:** A retrospective cohort study was conducted, including patients who underwent endoscopic therapy for small-bowel lesions. The primary outcome was rebleeding within 30 days of the procedure. Factors assessed included patient characteristics, lesion characteristics, and procedural characteristics.

**Results:** A total of 100 patients were included in the study. The rebleeding rate was 15%. Factors significantly associated with rebleeding included lesion location, lesion size, and endoscopic technique used.

**Conclusion:** Identifying and managing rebleeding risk factors post-endoscopic therapy is crucial. Further studies are needed to confirm these findings and explore potential preventive strategies.
